

# Bantam™ Product Comparison

The Bantam from PLCBuildings is the most complete 8 relay lighting control system on the market, with the most standard features of any comparable unit. To prove it we've put together this Product Comparison Guide showing all the features you get standard with the Bantam. Features that include 4 analog inputs (voltage or amperage) that are pre-programmed for photo sensors with 32 Setpoints. The Bantam also provides interaction capabilities the others don't come close to matching. When you look at all the data, the Bantam is your best choice.

Standard Features	Bantam™	Blue Box™	Peanut Panel	LiteKeeper8™
